

HONDA GENERATORS

The Honda EB series of generators are ideal for field operations. These generators provide the quietest source of portable power available with levels between 72 to 76dBA. With an automatic voltage regulator, the Honda EB series ensures consistent power flow under different loads. The generator's Oil Alert feature protects the engine by shutting the system down when the oil reaches an unsafe level. With AC circuit breaker/protectors and 120/240V operations, these generators can power almost any job with protection from overload.

Standard System Features:

- Portable power at 120/240V
- Quiet operation between 72 and 76 dBA
- Oil Alert Feature
- AC circuit breaker/protectors
- Automatic Voltage regulator
- 3 year warranty

SPECIFICATIONS

EL-GNH3000

Generator, Honda 3000 Watts. 2.7 Gallon fuel tank, full GFCI protection, and 3 year warranty included.

EL-GNH4000

Generator, Honda 4000 Watts. 6.3 Gallon fuel tank, full GFCI protection, and 3 year warranty included.

EL-GNH6500

Generator, Honda 6500 Watts. 6.6 Gallon fuel tank, full GFCI protection, 2 wheel kit with lift hook, and 3 year warranty included.
