

# TACTICAL LIGHTING SYSTEM

Part Number WS-T36ADDS  
General Purpose Lighting

**WESTERN SHELTER** SYSTEMS  
ISO 9001:2008 Registered Company

These general purpose string-able lights operate independently with on/off switches, and feature a twin-lamp design for high intensity lighting. With the Western Shelter Dimmer sleeve, each light can be adjusted to the perfect illumination level without the

need to electrical dimmer controls. The hook-and-loop closure straps anchor the sleeve at each outer end of the dimmer, so one-hand operation is easy. Light is not EMI protected but full EMI protection option is available.

## Key Features and Benefits

- Twin lamp design
- More efficient and lighter weight than magnetic ballast lights
- Flicker free, no excessive heat build up
- Low amp draw, will not tax field generators
- Available with patented dimmer sleeve technology
- Meets US and Canadian standards for water resistant portable lighting

## Standard Components

- Shatterproof, protective tube shield
- Hanger straps

## Optional Components

- Light Dimmer Sleeve™
